

Ditch Hitch® is the only vehicle recovery system on the market certified by a Professional Engineer to be shock loaded

Used in conjunction with nylon recovery straps with eyelets, no metal fixtures, the Ditch Hitch® eliminates the need to attach to points such as trailer balls, towing add-ons, tie-down hooks or bumpers never intended to withstand shock load forces and is fast becoming the industry standard for vehicle recovery.

The Ditch Hitch® Safe Vehicle Recovery System meets all **ENFORM** Vehicle Recovery and Towing Best Practices and Guidelines.

DITCH HITCH® FEATURES AND SPECIFICATIONS

- Only vehicle recovery product certified by a Professional Engineer to be shock loaded and side-loaded
- Fits standard frame-mounted receivers
- Patented swiveling U-Bar - turns with the pull in difficult situations and reduces strap wear
- High tensile corrosion treated pins
- Eliminates the use of dangerous metal towing objects such as hooks, shackles and chains
- Light weight and easy to use - 7.5 lbs
- Strength tested at 69,000 lbs, stamp-rated at 17,000 lbs with safety margin of 4:1
- Use Ditch Hitch® on both pulling and stuck vehicles
- High visibility, weather treated FuseLink™ recovery strap
